

Patented screw feeding system now extended to Europe and the US

Cabinplant has developed the screw feeding multihead weigher and has now been awarded with the European and US patents for the unique way of handling products on a multihead weigher.

US PATENTS : 12/534,652
RUSSIAN PATENT : 2435145 C2
AUSTRALIAN PATENT : 2006220135
JAPANESE PATENT : 5106215
EUROPEAN PATENT : EP 859237

Cabinplant provides various multihead weighing solutions, using either vibration or the patented screw feeding system.

*Superior handling
of marinated products*

Advantages

- Few-piece portions
- Minimized give-away
- Easy to wash down
- Excellent weighing accuracy
- Dismantling without tools
- Retrofit existing lines
- Fast return on investment

Cabinplant's screw feeding multihead weigher is especially designed to handle fresh, sticky and wet products such as:

- * Poultry cuts
- * Beef cuts
- * Pork chops
- * Lamb chops
- * Meat cubes
- * Seafood
- * Pasta
- * Cabbage
- * and more...
