

# Dispenser for plastic container

## CABINPLANT PRODUCT SHEET

By means of a sucking disc the dispenser picks up cups one by one from an above magazine and places them on below conveyor or step conveyor.

The dispenser has a magazine for each lane.

The magazine format set can be replaced by another format set for other cup dimensions.

### Application

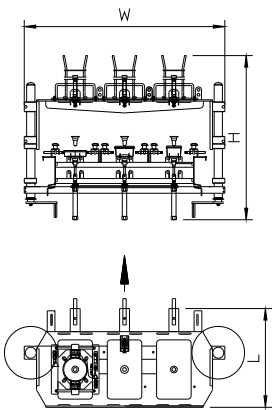

- Stackable plastic container, with round or square dimensions from approx. 50 mm to 350 mm

### Functionality

- Control that containers have been dispensed
- Operation system: vacuum sucking disc placed on pneumatic cylinder
- Option: magazine conveyor for stacked plastic container
- Exchangeable size parts for changing format
- Dispenser with up to 6 lanes

### Advantages

- Easy changeable formats
- Easy to clean
