**Cabinplant**

Precise by nature

# Our screw feeding multihead weigher is designed to reduce your give-away

Cabinplant screwfeeding multihead weigher is especially designed to handle fresh, sticky and wet products such as

- Poultry
- Beef
- Pork chops
- Lamb chops
- Meat cubes
- Seafood
- Pasta
- Cabbage
- and more...

A customer in the poultry industry saved **EUR 678,000** per year when investing in a Cabinplant weighing solution that reduced his give-away considerably.

## Example of savings per year

Product	Leg quarters
Containers per minute	100
Target weight	4.5 kg
Hours of operation per day	15
Days of operation per year	250
Value of product per kg	EUR 0.67

This figure does not include labour reduction by two operators per multihead weigher.

When reducing give-away by 1% of target weight:

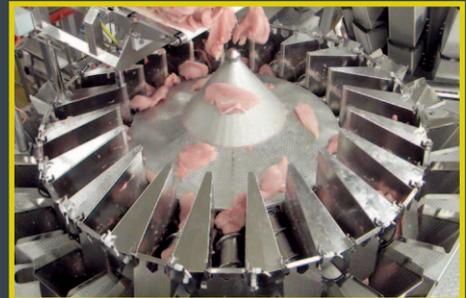

$$100 \times 4.5 \times 60 \times 0.01 \times 15 \times 250 \times 0.67 = \text{EUR } 678,375$$

The customers purchased several multihead weighers from Cabinplant, and the ROI for the equipment was approx. 18 months.

## Calculate your own cost of delay

Containers per minute	A
Target weight (in kg)	B
Containers converted to hours	60
1% of target weight	0.01
Hours of operation per day	C
Days of operation per year	D
Value of product per kg	E

$$A \times B \times 60 \times 0.01 \times C \times D \times E$$
