

Slice and wedge cutter FS-1500

Operating principle

The Sormac semi automatic slice and wedge cutter type FS-1500 cuts fruits and vegetables into wedges, slices or sticks. The machine is designed to cut two products per cycle. The product is placed onto the holders. The direct motor driven cycle is started by pressing both start buttons on the side of the machine.

Cut products are transported by a conveyor which can be set on continuous or a interval mode. The cut product can be either picked up manually or by containers.

In a special version, the FS-1500 / DF can be mounted on a dip flume for the treatment of sliced fruit and vegetables. For example sliced apples discolour very quickly. Collecting the apples in water immediately after slicing prevents discolouration.

Capacity

The capacity of the semi-automatic slice and wedge cutter type FS-1500 for fruits and vegetables is up to 1,500 pieces per hour.

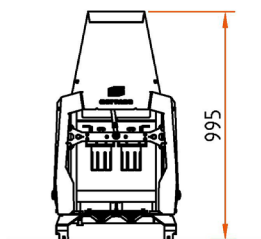

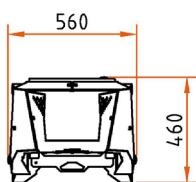

Features

- various cutting options: wedges, slices, sticks
- high quality cutting result with straight cutting edge
- direct motor driven cutting unit
- low maintenance
- easy to clean

Technical data

Type	FS-1500	FS-1500/DF
Voltage	230/400 V, 50/60 Hz	230/400 V, 50/60 Hz
Installed power	0.75 kW	1.23 kW
Dimensions (LxWxH)	2,400 x 530 x 1,785 mm	3,590 x 900 x 2,035 mm
Length belt (optional)	1,500 mm	1,500 mm
