Cabinplant
Precise by nature

Specially designed for handling both few-piece and large-piece portions

Cabinplant total packing solution for meat and poultry products. The production line is specially designed for handling both few-piece and large-piece portions.

The total packing solution is a 3in1 line for flexible portion sizes and multiple types of packaging. E.g., 3 different types of packaging can be handled on the same line.

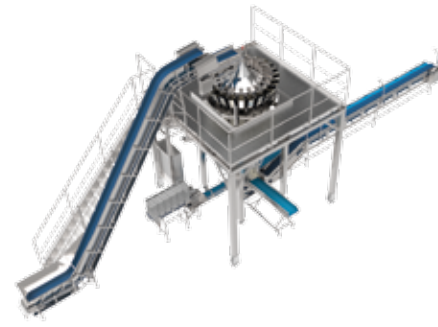

- **Stationary portion packing in tray**
- **Side-by-side packing on flight**
- **Direct filling in tray**

The line and the MHW are controlled from a 15" touch screen with pre-determined recipes and settings, providing a perfect overview of the line.

Ergonomic design offering operators the lowest possible lifting and reaching height, thus limiting injury to and wear and tear on operators and offering the possibility for natural light on operator area.

No condensation, e.g. water dripping from platforms; no noise from machines placed above operators.

Line and control are prepared for denester and magazine buffer for denester.

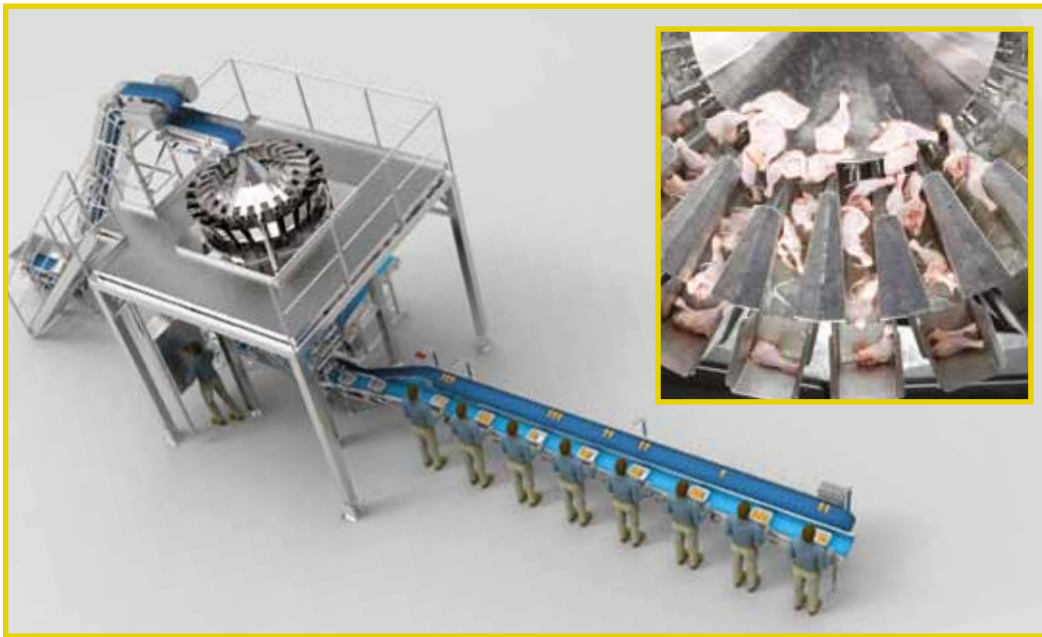

Application

- Various fresh meat products
- Poultry
- Pork
- Beef

Functionality

- Using sensor gate technology, the MHW handles few-piece portions.
- The open and hygienic design makes the complete line easy to clean.
- Tool has exchangeable/removable parts on distribution tool for future new formats.
- To fit need or plant layout, the number of operators can be increased or reduced.
- Simple change-over to transform from portion packing line to automatic tray filling line.
- Integrated possibility for batch portion packing.
